DATE MAILED: 08/31/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/801,441	Applicant(s) BROEMMELSIEK ET AL.	
	Examiner Jeremiah C. Huber	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 28-54 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) 28-54 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 07 March 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/21/2006 has been entered.

Claim Objections

Claims 35-39 and 50-54 are objected to because of the following informalities: The claims are dependant from another claim wherein the word 'consisting' was used in regard to certain claimed elements. The claims 35-39 and 50-54 attempt to further limit these elements. See MPEP 2111.03. The word consisting should be replaced with comprising or an appropriate equivalent term.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 28-30 and 40-45 rejected under 35 U.S.C. 102(e) as being anticipated by Randall (6727938).

In regard to claim 28 Randall discloses a method for defining a control zone in a field of view of a motion video camera the method including:

displaying motion video data representative of the field of view of the motion video camera (Randall fig. 2A and col.4 lines 36-47) ;

receiving indication of a tracking zone within the field of view (Randall col. 4 lines 46-58 note unless otherwise specified the entire field of view is monitored);

receiving indication of a selected region within the tracking zone having a selectable control zone type (Randall fig. 2B and col. 4 line 59 to col. 5 line 17); and

receiving indication of a control zone size for the selected region within the tracking zone (Randall figs. 2B and 5 and col. 6 line 61 to col. 7 line 8);

In regard to claim 29 refer to the statements made in the rejection of claim 28 above. Randall further discloses displaying graphics representative of the control zone

Art Unit: 2621

size in association with the field of view and the motion video data (Randall figs. 2B and 5 and col. 6 line 61 to col. 7 line 8).

In regard to claim 30 refer to the statements made in the rejection of claim 28 above. Randall further discloses use of a 'block out' zone (Randall fig. 2B and col. 4 line 59 to col. 5 line 17 note only one element is necessary for anticipation of a Markush group).

In regard to claim 40 Randall discloses a system for defining control zones of different types in a field of view of a motion video camera, the camera system including:

a database containing a description for each of a plurality of control zone types (Randall fig 5 #540 450 and 460 and col. 7 lines 9 to 38 note the database formed by the elements 540, 450 and 460 describes the masked or 'black-out' and tracking zones for each view);

means for defining a plurality of control zones in a selected area of the field of view of the motion video camera, the control zones being of a type selected from the plurality of control zone types in the database and defining a tracking behavior for the control zone (Randall figs. 2B and 5 and col. 6 line 61 to col. 7 line 8 note control zone type is selected from mask or 'black out' #460 and tracking #450); and

means for displaying a received motion video signal from the motion video camera including an indication of the defined control zones (Randall figs. 2A&B and col.4 lines 36-47 and col. 6 line 61 to col. 7 line 8).

In regard to claim 41 refer to the statements made in the rejection of claim 40 above. Randall further discloses providing a graphical representation of a size of the

selected area of the field of view with the received motion video signal (Randall figs. 2B and 5 and col. 6 line 61 to col. 7 line 8).

In regard to claim 42 refer to the statements made in the rejection of claim 31 above.

In regard to claims 43- 45 refer to the statements made in the rejection of claims 28-30 above.

Claim Rejections - 35 USC § 103

Claims 31-34 and 46-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Randall in view of Kageyama (5552823).

In regard to claim 31 Randall discloses a video surveillance method as stated in the rejection of claim 28 above. Randall further discloses detecting movement in a field of view of the motion video camera (Randall fig. 1 #130 and col. 4 lines 36-47) and determining if the moving object is in a tracking origination zone (Randall col. 4 line 59 to col. 5 line 17). It is noted that Randall does not disclose details of tracking. However the 'defining' and tracking of objects was common and notoriously well known in the art at the time of the invention as is shown by Kageyama (Kageyama fig. 1 and col. 4 lines 30 to 46 note the tracked object is 'defined' by a window frame that encloses the moving object). It is therefore considered obvious that one of ordinary skill in the art would recognize the advantage of including in Randall object tracking as taught by Kageyama in order to detect moving direction and movement distance as suggested by Kageyama (Kageyama col. 3 lines 26 to 31).

In regard to claim 32 refer to the statements made in the rejection of claim 31 above. Randall further discloses determining if the moving object has entered a new control zone type (Randall col. 4 line 59 to col. 5 line 17), determining if the new control zone type is a tracking continuation zone, repeating tracking procedures if the new control zone is a tracking continuation zone (Randal col. 4 lines 36-47 note the unmasked or tracking areas will continue to detect a moving object unless it enters a masked portion of the image).

In regard to claim 33 refer to the statements made in the rejection of claim 31 above. . Randall further discloses determining if the moving object has entered a new control zone type (Randall col. 4 line 59 to col. 5 line 17), determining if the new control zone type is a tracking continuation zone, repeating tracking procedures if the new control zone is a tracking continuation zone (Randal col. 4 lines 36-47 note the unmasked or tracking areas will stop to detecting a moving object if it enters a masked portion of the image).

In regard to claim 34 refer to the statements made in the rejection of claims 30-31 above.

In regard to claims 46-49 refer to the statements made in the rejections of claims 31-34 and 43 above.

Claims 35-39 and 50-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Randall in view of Kageyama.

Claims 35-39 and 50-54 are rejected over Randall in view of Kageyama as set forth in the rejection of claims 34 and 49 above. Randall in view of Kageyama discloses an entry zone where tracking is both originated and continued (Randall col. 4 line 36 to col. 5 line 17 note unmasked area), and a black-out zone (Randal col. 4 line 59 to col. 5 line 17 note masked area). It is noted that neither Randall nor Kageyama explicitly disclose the use of privacy or exclusion zones however the official notice taken in regard to the use of privacy and exclusion zones in previous actions has not been challenged and is therefore considered as admitted prior art. It is therefore considered obvious that one of ordinary skill in the art at the time of the invention would have recognized the advantage of further modifying Randall in view of Kageyama to include privacy and exclusion zones for the at least the same reasons as set forth in the previous actions.

Response to Arguments

Applicant's arguments with respect to claims 28-54 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mills et al discloses a surveillance system that uses definable privacy zones.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremiah C. Huber whose telephone number is (571)272-5248. The examiner can normally be reached on Mon-Fri 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571)272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
